

A Prognostication

for ever, made by Erra Pater, a
Iew, bozne in Iury, Doctor in
Astronomie and Physicke :

very profitable to keepe
the body in health :

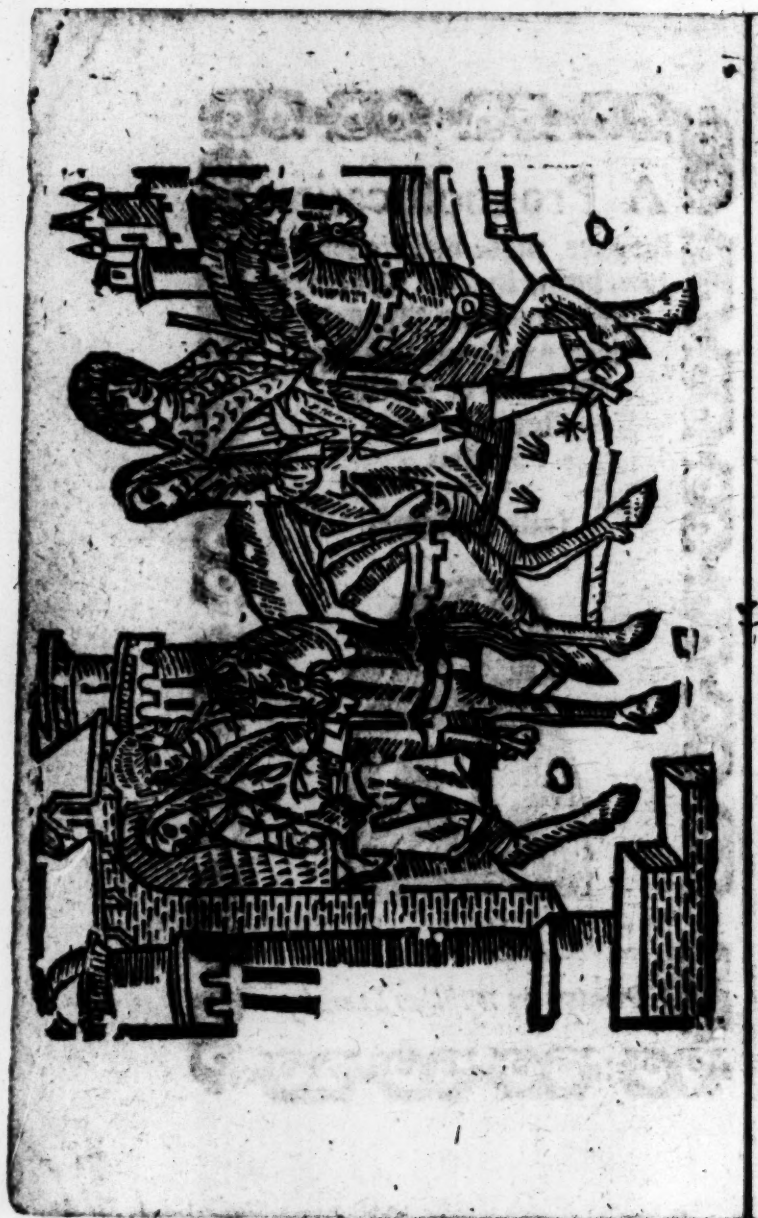

And also Ptho-
lomeus

saith the same.

LONDON,

Printed by *William Stansby.*

ERRA PATER.

A Prognostication for euer
made by Erra Pater.

A I finde in the Science of
Astronomie, there bes foure
manner of Cholers in Mans
body, of the foure complexi-
ons. The first is blond, the second blacke
Choler, the third Flumes, and the fourth
yeallow Choler: and if one of the foure
lacke, all the body will be forthwith dead,
for as much sustaineth one of them the
body, as the other.

And each of them ought to be at a cer-
taine, for if one of them surmount ano-
ther, all the body shall haue damage ther-
by: and all foure bes perillous: for if the
Blond surmount the other, it will soone
destroy and overcome the body, and make
him Die: for it gathereth and likewise
congealeth euen right on the Heart, and
the

The Prognostication,

the breath, and in that manner (lessening) by little and little is overcome and dead, but all that time when the great course taketh him, it may some be asswaged by taking away a little blood from him, for then all that perill will asswage.

Also the blacke cholers be right perilous, and if they surmount the other, they doe great damage to the body by many and diuers meanes: for they cause the body to fall, by the euill sickness, and to lose his wit and knowledge, and become a foole, & they cause all the body to be full of euill scabs, and oftentimes to be mesall, and they make a man to be fearefull and a coward, and of many euill manners. And by heards, flowers, fasting abstinence, drinks and medicines, they may be asswaged.

The Fluxes that be white, be right perilous also, when they surmount the other cholers of the body, and doe great damage and hurt: for they engender goutes and many other euill sicknesses that be cold: and they also hurt the feet, the legs, the knees, the hands, the reins, and the teeth: and make the mouth and the

of Erra Pater.

the breath stinking, and the nose and the eares, and causeth many other diseases and sicknesses. And they may be asswaged by hearbs, flowers, roots, medicines, drinks, and also by vomiting.

Also the yellow cholers, be perillous, for when they surmount the other cholers in a mans body, they asswemb the heart, and trouble the braine, and maketh all the members feeble and soft and taketh away the will and appetite from the body, that it may neither eat nor drinke, and also they change a mans colour, and maketh him to lose his sight and become blinde. And they may be asswaged by hearbs, flowers, roots, and by vomiting.

The foure humours be of foure complexions, and they haue the domination of the body foure times in the yere: and each of them a quarter of a yere.

It is to bee understood that in the yere is twelue moneths, and in the twelue moneths are two and fiftie weekes, and in the two and fiftie weekes, are three hundred threescore and five dayes, and in the three hundred threescore and five dayes

The prognostication.

are contained eight thousand seven hundred and threescore houres.

A farthing a day is i. d. ob. q. the wêke.

The moneth vii. pence.

The yere vii. s. vii. d. q.

A halfe penny a day, is iii. d. ob. the wêke.

The moneth fourténe pence.

The yere x. s. ii. d. ob.

The disposition of the first part of the yere, Capricornus, Aquarius and Pisces.

The first part of the yere that hath domination in the body of man, is thre moneths, and these be their signes, Capricornus, Aquarius, and Pisces. And these thre signes haue power over the humes in the bodie of man and woman, and they be cold and moist, and they begin to raigne the xviij day of March.

The disposition of the second part of the yere, Aries, Taurus, and Gemini.

The second part of the yere is other thre

of Erra Pater.

three moneths, and these be their signes
Aries, Taurus, and Gemini. And these
haue power in the body of man; of the
beast: and they be hot and moist. And
they begin to raigne the xxiij. of Iune.

The disposition of the third part
of the yeere, Cancer, Leo
and Virgo.

The third part of the yeere is other
three moneths, and these be their signes,
Cancer, Leo, and Virgo. And they haue
power in the body of man of the realow
cholers, and they be hot and dry. And
they begin to raigne the xxiii. of Iune, and
dureth vnto the xxiii. of September.

The disposition of the fourth part
of the yeere, Libra, Scorpio,
and Sagitarius.

The fourth part of the yeere be other
three moneths, and these be their signes,
Libra, Scorpio, and Sagitarius. And they
be cold and dry, and they begin to raigne
the

The Prognostication

the xxij. of September, and dureth vnto the xxij. of December.

And by the manner of these foure seasons euery man may keepe him from all the contraries of meates, drincke, and clothing, and from all other contraries. And if a man will keepe himselfe after the manner which is rehearsed in this Booke, he shall neuer haue infirmities of body, by the grace of God.

Take Belliter of Spaine, and chew it in the month, for it is good to purge the head and the body. And eate Fenell seede and Comin seede, for each of those seedes destroy the flames, whereof all the euils in any mans body come.

Call.

Ignis, Iuuentus & Aestas.

The water red and thinne, the grasse male red and hard, the spittle thicke and clammy. The signes Aries, Leo, and Sagirarius, is ingendred of chollerike, hot, dry, and orientall, if the sickness be taken in these signes it is great peril, butt if his medicine be cold and moist, and his

6

of Erra Pater.

his dyet of the same complexion : Then
he may be healed by the grace of God.

West.

Aer, adolescentia, Ver.

The water red and thicke, the grose
male red & thin, the spittle thin and sweet,
the extremities out of course. The
signes, Gemini, Libra, and Aquarius is
ingendred of sanguine, hot ; moist, and
Occidentall, the cure is cold and dry,
with the dyet of the same complexion.

Cassia Fillula in Aqua vitæ.

North.

Terra, Senectus, Autumnus.

The water white and thin, the grose
male black & thicke, the spittle thicke and
sower, the extremities bnneth self : the
signes Taurus, Virgo, and Capricornus,
hee is ingendred of melancholy, cold and
dry, Septentrional : the cure hot & moist,
with the dyet of the same complexion.

South.

male

The Prognostication

male white and thicke, the spittle thinne and sweete, the extremities feeble. The signes, Cancer, Scorpio, and Pisces, it is ingendred of flames, cold and moyst, Meridionall, the cure hot and dry, with the dyet of the same complexion.

Here he sheweth of all the dismall or perillous dayes that come in the yeare.

Masters of Astronomy and Physicke that this craft first found, tell the most perillous and dangerous dayes in the yeere. In which if any man or woman be let blood of wound or beine, they shall dye within xxi. dayes following. Or who so falleth into sickenesse on any of these dayes, they shall neuer escape it till they be dead. And who so taketh any great journey in any of these dayes to goe from home, hee shall bee in danger to dye ere he come home againe. And who so weddeth a wife in any of these dayes, they shall soon be parted, or else they shall lye together with much sorrow. And who so beginneth in any of these dayes any

of Erra Pater.

Any great woꝝke, it shall neuer come to good end: and these are the dayes following.

That is to say.

In Ia nuary are eight dayes, that is to say, the first, the second, the fourth, the fifth, the tenth, the sixteenth, the seauententh and the nineteenth. i.

In February are thre dayes, the viii. the x. and the xiiii. ii.

In March are thre dayes, the xv. and the xvi. and the xix. iii.

In Aprill are two dayes, the xv. and the xxi. iiii.

In May are thre dayes, the vii. the xv. and the xx. v.

In Iune are two dayes, the xiii. and the vii. vi.

In Iuly are two dayes, the xv. and the xx. vii.

In August are two dayes, the xix. and the xx. viii.

In September are two dayes, the vi. and the vii. ix.

In October is one, the vi. x.

In Nouember are two dayes, the v. and the xix. xi.

In

The Prognostication

In December are three dayes, the viij. the xij. and the xvi. Et alij dicunt, the xv. and the xvi.

And who so will learne the Canicular dayes, which are dayes of great danger and perill, as Clarkes say, may know they begin the xv. Kalend of August, and continue to the fourth Nones of September, which season is very perillous to take sicknesse, and it is also perillous to take drinckes & medicines, or to let blood, but if it be great neede, and then it must be after the midst of the day.

Here beginneth the distance betweene the Signes.

It is to bee understood that there is a Circle in the Firmament, that is called Zodiack, and it is divided into twelue euen parts, and those parts bee called the twelue Signes, and in Latine these bee their names: Aries, Taurus, Gemini, Cancer, Leo, Virgo, Libra, Scorpio, Sagitarius, Capricornus, Aquarius, and Pisces.

These twelue Signes are in complexion like vnto the foure Elements, that is,

8

of Erra Pater.

is to say, the Fire the Ayre, the Water,
and the Earth: the fire is hot and dry,
his Element is likened vnto the Ram,
the Lyon, and the Boaster, for these be
hot and drie: also the Ayre is hot and
moyst, his Element is likened to the
Childzen, the Ballance, and the Water-
bearer, for they be hot and moyst. The
Water is cold and moyst, and to the wa-
ter is likened the Crab, the Scorpion, and
the Fish. The earth is dry and cold, to
the earth is likened the Bull, the Goat
and the Goat, for they be dry and cold.

And every one of the signes is di-
vided into thirtie even parts, these
parts are called degrés, and every de-
gré is divided into threescore even parts,
and these parts are called minuts, and
every minute is divided into threescore
even parts and these parts bee called
seconds, and so forth to the thirds and
fourths.

It is also to be understood that there
are seven Planets, as Saturnus, Iupiter,
Mars, Sol, Venus, Mercury, and Luna.
These be the seven moueable Starres.
The astraia fixe signes take great
polder

The Prognostication.

power and might of the seven Planets, and the seven Planets take great power of the twelve Signes: for the Planets be to the Signes as the soule to the body, and the Signes to the Planets as the body to the soule. For like as the body can doe nothing without the soule, nor the soule doe any thing without the body, no more may a signe without one of the seven Planets.

Saturnus is the highest, and next beneath Saturnus is Iupiter, beneath Iupiter Mars, beneath Mars Sol, beneath Sol Venus, beneath Venus Mercurius, beneath Mercurius Luna.

The wise Philosophers say it is from the earth to Luna, $\text{xxviij. C. l. miles}$.

From Luna to Mercurius, is $\text{xij. C. vij. miles}$ and a halfe.

From Mercurius to Venus, as many.

From Venus to Sol is xxiii. C. lxx. C. and xxviii. miles .

From Sol to Mars is xx. C. vij. C. and five and twenty miles.

From Mars to Iupiter is threescore and eight thousand, seven hundred, and six miles.

From

9
of Erra Pater.

From Iupiter to Saturnus as many.
From Saturnus to the firmament, is
five score $\text{M. lxxx. C. lxxxv. miles.}$

The summe of all the miles is sea-
venscore and eightene thousand, four
hundred threescore and three miles.

Hereafter followeth a coniunction of
the change of the Moone.

When the Prime is on the letter A.
the iij. day before the Prime the
xv. houre, shall be the change of the Moone.
And you shall begin to tell your houres
at midnight, for a day naturall is from
midnight to midnight. When the Prime
is on the Letter B. then the third day
and fourth houre after midnight it shall
change. When it chanceth on the Letter
C. then the fourth day and eighth houre.
When it is on the letter D. then the
fourth day and twentieth houre, When
it is on the letter E. the fourth day, and
eighteenth houre. When it is on the
Letter F. then the third day and sixteenth
houre. When it is on the Letter G. then
the third day and fourteenth houre.

25

The

The Prognostication

The disposition of the xii. Moneths
for blood-letting.

January.

In the moneth of January, let thee not
blood in the first day, for it is perillous,
nor the second day, nor the fifth day, nor
the seventh day, nor the eighth day, nor the ninth day,
nor the tenth day, nor the eleventh day, but as of-
ten as thou wilt drinke good white wine
fasting, and also take good heed of the
dayes that be above written, for they be
perillous to bleede on, except the signe
be right good for blood-letting.

February.

In the moneth of February, eat no po-
tage made of Hocks or Mallowes, for
they are venome. And if thou hast neede
to bleede on thy wrist, or on thy arme,
bleede not the thirtieth day, nor the thirty-first day, nor
on the first day, nor on the second day, nor
on the third day, but that the signe be ve-
ry good, and thou have great neede.

March.

In the moneth of March, eat Figs,
Ratzens,

of Erra Pater.

Meates, and sweet meates and drincke,
and eate hot meates, and let thee bleed on
the right arme, on the first day, or on the
xv. day, or on the xvii. day, so that is good
against all manner of Fevers, but be-
ware thou bleed not the first day. no; the
xv. day, no; the xvi. day, no; the xix. day,
no; the xviii. day if thou maist chuse:
and if thou dar, looke the signe be very
good.

Aprill.

In the moneth of Aprill, bleed on the
left arme on the third day, or on the vi.
day, or on the xv. day, & thou shalt have
no great head-ach no; lesse thy sight of
all that yeare, and be fresh and hot meates
but bleed not the vii. day, no; the viii.
day, no; the x. day, no; the xx. day, so;
these dayes be not good so; bleeding.

May.

In the moneth of May rise early, and
eate and drinke betime, and be good
meates and drincke but eate neither of
head no; foote while that last, and let
the blood on the first day, or on the eigh-
teenth day, on which arme thou wilt, or

23

on

The Prognostication

on the xxiii. day, or on the xxviii. day,
and it shall much helpe thee against all
manner of euill, but beware that thou
bleed not the third day, nor the first day,
nor the xii.

June.

In the moneth of Iune some Physiti-
ons say, that it is good every day to drinke
a quantity of cold water fasting, and rule
thee of thy meate and drinke, and if thou
hauene need, bleed on the xxiii. day, for that
is good, but beware that thou bleed not
on the viii. day, nor on the x. day, nor the
xii. day, nor xvi. day nor the xx. day.

July.

In the moneth of Iuly, keepe thee from
Lecherie, for then the braine and the hu-
mours all alwayes open: and bleed not
in this moneth, but if thou haue great
need, and then beware alway that thou
bleed not on the xiii. day, nor on the xv.
day, for it is dangerous.

August.

Of Erra Pater.

August.

In the moneth of August, eate no manner of Meats, nor any manner of hot meates and drinckes of spicerie, nor blée on the first day, nor the xx. day, nor the xxix. day, nor the xxx. day: the other dayes thou maist blée for great need, if the signe be good for blood-letting, but not else, if thou loue to keepe thy body in good health.

September.

In the moneth of September, all manner of fruits that is ripe and not infected, is good for to eate: and blée not the iii. day, nor the liii. day, nor the xvi. day, nor the xxi. day, nor the xxii. day. But blée on the xvi. day, or the xviii. day, for the droppe, phrensie, palse, or the falling euill, and dread the not all that yere after any of them.

October.

In the moneth of October, drinck good and wholesome wine, & blée not except great neede make the, and loke that the

The Prognostication

signe be very good, but yet beware that thou bleed not on the third day, nor the first day, nor the xxiii. day, and thou wilt doe well.

November.

In the moneth of Nouember, blæde not but so; nēd, so; all the blood is gathered that time vpon the head beine: bath not, but vent the a little of grasing. so; then all the humours be ouer-quickē to blæde and if case be that thou haue great nēd so; to blæde, beware of the first day, the vi. day, the xv. and the xix. day, the xxiii. day, and the xix.

December.

In the moneth of December, blæde not but if thou haue great nēde so; thy health. And in case thou haue much nēd to bleed, beware of the vii. day, the xv. day, the xvi. day, the xvii. day, and the xxii. day, but blæde on the xxvi. day, so; that is not hurtfull: and in this moneth come not nīe the fire with thy shanks.

A

12
of Erra Pater.

A rule to know and vnderstand the yeare
that shall be plenteous, and in great
abundance of goods.

In die Dominica. That is Sunday

In the yere that Ianuary shall enter on
the Sunday, the Winter shall be cold
and moyst, the Summer shall be hot, and
rainy, with great abundance of Cozne,
of Wines, and other graines, and of all
garden Fruits, and hearbs: there shall
be little Dile. abundance shall be of all
manner of flesh: some great newes shall
men heare spoken of Kings and Prelates
of the Church, and also of great Princes:
great warres and robberies shall be
made, and many young people shall die.

In die Lune. That is Munday.

In the yere that Ianuary shall enter
on the Munday, the Winter shall be
peaceable enough, & the Summer shall be
very temperate. There shall be great
floods of waters that shall breake out of
their limits and bounds, and many ships

The Prognostication.

Upon the Sea shall perish and in that
yere shall raigne diners sicknesses, and
changes of great Lords shall be made,
many women shall perish in traouelling
with child, many great Lords shall die.
That yere shall be but little Grass and
mustard seede, no; but litle Oile, but
there shall be plenty of Cozne and Wines
and flesh shall be good cheape.

In Die Martis. That is Tuesday.

In the yere that Ianuary shall enter
on the Tuesday, the Winter shall be
bushfast and changeable, so; without all
doubt it shall freeze in the Prime, which
shall hurt sore the Rye, the Wines, and
the flowers. The Summer shall be dry,
hot and burning, insomuch that the gar-
den hearbs shall haue no power to come
out of the ground. All things shall be
deere saue only Cozne, many men shall
die of the bloody fluxe, there shall be no
tidings of Thunder, lightning and tem-
pest, but all flesh shall be very deere, ma-
ny Wines shall this yere turne, and so
be naught.

of Erra Pater.

In die Mercurij. That is Wednesday.

In the yere that Ianuary shall enter
on the wednesday, the winter shall be
temperate but in the end there shall be
snow and frosts, the prime time shall
be rainy, there shall be great abundance
of Grasse of Hay, of Corne, of Fruits of
Vines, and generally of all good things.
The Summer shall be but little cloudy,
by which shall come great sickness: Poor
labourers, as handy-crafts and Artifi-
cers shall gaine mēty well that yere:
there shall be many Theenes, by whom
the meane people shall be soze pilled and
discomfited: great warre, battel, and
slaughter shall be towards the midst of
the yere, by the which shall come great
good to some men. In the end of the yere
shall be others pestilences, botches, and
falling evils, especially nere the Sea.

In die Iouis. That is Thursday.

In the yere that Ianuary shall enter
on the Thursday, the winter shall be
long and most part drye, and the yere
shall be very wholesome. The Prime
time

The Prognostication

time shall be wholesome and very win-
die: the Summer shall be temperate and
Haruest shall be most part rainy, so that
the waters shall soze bzeake out of their
bounds: the Wheate and Wines shall
be good cheap: there shall be of Dates
Hay, Graffe, and of fruits, competently
enough. Great warre and division shall
be betwene the Church and the Kinges
and Princes, and in the end the Princes
shall haue victory of their enterprises,
This yere women shall set themselves
much to Lecherie: also people shall be
well gased of taxes and tallages.

In die Veneris. That is Friday.

If the yere that Ianuary shall enter
on the Friday, the winter shall be long
and dry, & the Summer unwholsome:
Haruest shall be dry, all Cozne shall be
deare: the Wintage shall be good enough,
and abundance of Dyle, of Fruit, of
Hay, of Graffe, and of Garden Hearbs,
the world shall be soze persecuted with
diuers sicknesses, as soze eyes, and of all
Elkes: many young children shall dye.
great

14
of Erra Pater.

great Thunder, Lightning and Tempest shall be, that shall grieue soze all the ground: there shall be Earthquakes: all cloath shall be good cheap: poore people shall gaine little or nothing: many beasts shall dye by hunger through the scarcitie of the same.

In die Sabbati. That is Saterdag.

In the yere that Ianuary shall enter on the Saterdag, the Winter shall be temperate sufficiently, and in the Prime time shall be Frosts, the which shall destroy the Trees, the Vines, the Dyles and the Fruits: the Summer shall be mostly temperate: the harvest time shall be good cheap, of garden hearbes shall be plenty: all flesh shall be good cheap: many old people shall dye: Feauer Tertians shall grieue soze the world, and many murmurations, warres, and murders shall be done by one against another, and neighbour against neighbour, and many other euill acts shall be oftentimes committed and done.

Of

The Prognostication.

Of the signification of Thunder on
euery day in the weeke.

If it thunder on the Sunday, there will
bee a great death of Clarkes & Judges
& also peruerse people by signification.

If on the Monday it chance to thun-
der many women shall die then and the
Sun will suffer Eclipse, by signification.

If it thunder on the Tuesday, it be-
tokeneth great plenty of Cozne.

If on Wednesday it chance to thun-
der, it betokeneth that yere common
women and light wenches, and foolish
women shall die, and then shall be great
blood shedding.

If it thunder on the Thursday, then
shall be very cheape and much plenty of
Cozne.

If on Friday it chance to thunder,
it betokeneth that a great man shall be
slaine, and diners other murders, and
other evils.

If on Saturday it chance to thun-
der it betokeneth that there shall be a
great generall pestilent plague, whereof
many shall die.

The

15
of Erra Pater.

The saying of Erra Pater to the
Husbandman.

IF the day of Saint Paul be cleare,
Then shall betide an happy yeare:
If it doe chance to snow or raine,
Then shall be deare all kinde of graine:
But if the winde then be aloft,
Warres shall vex this Realme full oft:
And if the clouds make darke the Skie,
Both Neat and Fowle this yeare shall die.

The Raignes of the Kinges of England,
since King William the Conqueror.

King William the Conqueror, began
his raigue the xiiii. of October, in the
yeare 1066. and died the ninth of Sep-
tember, in the yeare 1087. and was bu-
ried at Caen in Normandy.

R. William Rufus began his raigue the
ix. day of September, in the yeare 1087.
and died the first of August, in the yeare
1100. and was buried at Winchester.

R. Henry the first began his raigue the
first of August, in the yeare 1100. and
died the second of December, in the yeare
1135. and was buried at Redding.

R. Stephen

The Prognostication

K. Stephen began his raigne the second day of December, in the yeere 1135. and died the 25. day of October, in the yeere 1154. and was buried at Feuersham.

K. Henry the second began his raigne the 25. day of October, in the yeere 1154. and died the vi. day of Iuly. in the yeere 1189. and was buried at Font Euerard.

K. Richard the first began his raigne the vi. day of Iuly. in the yeere 1189. and died the vi. day of Aprill, in the yeere 1199 and was buried at Font Euerard.

K. Iohn began his raigne the vi. day of Aprill, 1199. and died the xix. of October 1216. and was buried at Worcester.

K. Henry the third began his raigne the 19 of October, 1216. died the 16. of November 1272. buried at Westminster.

K. Edward the first began his raigne the 16 of Nouember, 1272. and died the 7. of Iuly, 1307. buried at Westminster.

K. Edward the second began his raigne the vii. of Iuly, 1307. died the xxi. of Ianuary, 1326. buried at Glocester.

K. Edward the third began his raigne the xxi. of Ianuary, 1326. died the xi. day of Iune, 1377. buried at Westminster.

K. Richard

16

of Erra Pater,

K. Richard the second began his reign the xxi of Iune 1377. died the 29. of September 1399. buried at Westminster.

K. Henry the fourth began his raigne the 29 of September. 1399. died the xx. day of March 1412 buried at Canterbury.

K. Henry the fift began his raigne the xx. of March 1412. died the 31. of August 1422. buried at Westminster.

K. Henry the sixt began his raigne the 31. of August 1422. died the 4. of March 1460. buried at Windsor.

K. Edward the fourth began his raigne the fourth of March 1460. died the ix. of Aprill 1483. buried at Windsor.

K. Edward the fift began his raigne the ix. of Aprill 1483. died the 15. day of Iune 1483. Buried in the Tower.

K. Richard the thirde began his reigne the 15 of Iune 1483. died the 22. of August 1485. buried at Leycester.

K. Henry the seauenth began his reign the 22. of August 1485. dyed the 22. of Aprill 1509. buried at Westminster

K. Henry the eight began his raigne the 22 of Aprill 1509. died the 28. of Ianuary 1546. buried at Windsor.

K. Edward

The Prognostication

King Edward the first began his raigne the xxvij. of January in the yere 1553. and died the first day of July, in the yere 1556. buried at Westminster.

Queene Mary began her raigne the first day of July, 1553. died the xxij. of November. 1558. buried at Westminster.

Queene Elizabeth began her raigne the seauentienth day of November, in the yere of our Lord God 1558. Died the xxij. of March, 1602. Buried at Westminster.

King James began his raigne the 24. day of March 1602. Died the xxij. of March 1625. buried at Westminster.

King Charles began his raigne the 27. day of March 1625. To whom God grant long to raigne. Amen.

Heere

17
of Erra Pater.

Here followeth a Rule to know when the
Termes begin and end, with their
Returnes.

Hillary Terme beginneth the xxiij. of
January, & endeth the xij. day
of February, and hath foure returnes: that
is, Oet. Hill. Qui. Hill. Cra. Pur. Oet. Pur.

Easter Terme beginneth xviij. dayes af-
ter Easter daye, and endeth the Sunday
next after the Ascension day, and hath
foure returnes: that is, Qui. Pas. Tre. Pas.
Mens. Pas. Qui. Pas. Cra. Asc.

Trinitie Terme beginneth the Fry-
day next after Trinity Sunday, and en-
deth the Wednesday fortnight after, and
hath foure returnes: that is, Cra. Tri.
Oet. Tri. Qui. Tri. Tre. Tri.

Michaelmas Terme beginneth the ix.
day of October, and endeth the xxvij.
of November, and hath eight re-
turns: that is, Oet. Mi. Qui. Mi. Tres. Mi.
Mens. Mi. Cra. An. Cra. Mar. Oet. Mar. Qui.
Mar.

Eight dayes before any Terme begin
the Exchequer openeth, except Trinity
for then it openeth but foure dayes before.

¶
